

Output format of project2:

A) Total number of connections:

B) Connections' details:

Connection 1:

Source Address:

Destination address:

Source Port:

Destination Port:

Status:

(Only if the connection is complete provide the following information)

Start time:

End Time:

Duration:

Number of packets sent from Source to Destination:

Number of packets sent from Destination to Source:

Total number of packets:

Number of data bytes sent from Source to Destination:

Number of data bytes sent from Destination to Source:

Total number of data bytes:

END

+++++

.

.

.

+++++

Connection N:

Source Address:

Destination address:

Source Port:

Destination Port:

Status:

Duration:

(Only if the connection is complete provide the following information)

Start time:

End Time:

Number of packets sent from Source to Destination:

Number of packets sent from Destination to Source:

Total number of packets:

Number of data bytes sent from Source to Destination:

Number of data bytes sent from Destination to Source:

Total number of data bytes:

END

C) General

Total number of complete TCP connections:

Number of reset TCP connections:

Number of TCP connections that were still open when the trace capture ended:

D) Complete TCP connections:

Minimum time durations:

Mean time durations:

Maximum time durations:

Minimum RTT values including both send/received:

Mean RTT values including both send/received:

Maximum RTT values including both send/received:

Minimum number of packets including both send/received:

Mean number of packets including both send/received:

Maximum number of packets including both send/received:

Minimum receive window sizes including both send/received:

Mean receive window sizes including both send/received:

Maximum receive window sizes including both send/received:
